

**NAME**

wimlib-imagex-dir – Show the files contained in a WIM archive

**SYNOPSIS**

**wimlib-imagex dir** *WIMFILE IMAGE* [*OPTIONS*]

**DESCRIPTION**

Lists the files and directories contained in the specified image of the Windows Imaging (WIM) file *WIMFILE*. This command is also available as simply **wimdir** if the appropriate hard link or batch file has been installed.

*IMAGE* specifies the image in *WIMFILE* to show the files of. It may be a 1-based index of an image in *WIMFILE*, the name of an image in *WIMFILE*, or the keyword "all" to indicate that files from all images in *WIMFILE* are to be shown. Use the **wimlib-imagex info** (1) command to show what images a WIM file contains.

**OPTIONS**

**--path=PATH**

List the files recursively from the *PATH* directory instead of from the root directory.

**NOTES**

**wimlib-imagex dir** supports split WIMs, but it will only work on the first part of the split WIM.

The DOS names of files are not displayed.

Alternate (named) data streams are not displayed.

**EXAMPLES**

List all files in the first image of 'boot.wim':

```
wimlib-imagex dir boot.wim 1
```
